

Tutorial Event

MHPL will be hosting the **Tissue Preparation for Immunohistochemistry** tutorial. You will be able to see firsthand paraffin and frozen tissue preparation; fixation and embedding procedures.

Space is limited. RSVP to reserve your spot. If you are not able to attend this session there will be more to come in the near future. We look forward to receiving an email confirming your reservation or waiting list placement.

Tissue Preparation for Immunohistochemistry Agenda

- 1) Proper tissue handling for paraffin embedding and cryostat sectioning-waking through tissue fixation, paraffin embedding and the tips for the best morphology and staining results
- 2) Demonstrate tissue freezing methods for both fresh and fixed frozen tissue
- 3) Discussion and Q&A Session
